The problem isn't really that the mobile Flash Player was terminated, it's the loss of trust in Adobe that comes with it.

like C#, C++, haXe or even Objective-C, maybe even Python.

Flex for the web is clearly unsuitable by now.

so I too was looking forward to finally be able to change the audio file

Check the onComplete handler in the script and you see how loadCompressedDataFromByteArray() is called and right after it sound playback is started.

I don't really care whether the code files are easily accessible and can be stolen, that can be done with Flash too. been moved to it's official URL www.tetragonengine.com so I recommend to update your bookmarks.

I however have to be completely honest with you, I never will be attracted by HTML5 as a programming solution. about this! There is a lot of potential in the new sound API, if it and also MP3 files.
