After that we still have the AIR platform for desktop and mobile apps and as long as the AIR platform continues to exist there is absolutely nothing in the way of Tetragon s development.

If you can please go to Adobe s Bug report site and make some noise

Since the AS3 Sound class had no methods to accept any byte data the workaround to load MP3 files as raw byte data so far has been to load them with URLLoader and then wrap the MP3 data into an in-memory SWF that is created with the help of AS3SWF.

That s what I always wanted to do.

Upper layers depend on lower layers, but not vice versa. What follows is a brief overview of the layers and their various components, from bottom to top.

HTML isn t even a programming language, it s a markup that reminds me back in horror on the early days of the internet where there was an era during that I used this stuff.

sure many audio-related Flash devs have been looking forward to since a long time and

I ve been trying to register there, by now with three different Email addresses but never got any confirmation Email back from them, so I can t log in.

How will all this affect Tetragon? For now this doesn t affect the development of Tetragon at all.

on some other game design- and game development-related things or concentrate wholly onto another technology
