so I too was looking forward to finally be able to change the audio file

I don't really care whether the code files are easily accessible and can be stolen, that can be done with Flash too. like C#, C++, haXe or even Objective-C, maybe even Python.

The problem isn't really that the mobile Flash Player was terminated, it's the loss of trust in Adobe that comes with it.

about this! There is a lot of potential in the new sound API, if it

AIR is extremely attractive for game developers who want to deploy to the desktop and mobile platforms with the same code base and that is clearly one of Tetragon's goals.

Flex for the web is clearly unsuitable by now.

Check the onComplete handler in the script and you see how loadCompressedDataFromByteArray() is called and right after it sound playback is started.

This works fine on desktop- and on Android builds.

I learned to love ActionScript's clean and typed syntax and it's compact distribution form as compiled and compressed binaries.
