Flash gave me easy access to learn a professional programming language for creating games.

It shows all the major components that tetragon consists of.

zip files via random access, which is quite cool and something I explained here).

Unfortunately Adobe s so called Bug and Issue Management System seems to be quite bugged by itself.

Neither does it seem to matter for their CEOs and marketing managers that JS and HTML is one giant jumble of incoherent, unoptimized mess that lacks any OOP structure and that no decent game developer on earth wants to code with.

The open-sourcing of the Flex framework in my opinion is far more concerning than the end of the Mobile Flash Player.

Seems it wasn t even tested properly.

These resource packages contain all the asset files, which can be images, XML files, SWF files, etc.

Of course they didn t! All of a sudden some Flash devs seem to be strangely attracted by HTML5 and Javascript while others have a more exotic view toward the nature of the internet.

With Javascript you get something that is at the level of ActionScript 1 without strong typing, loads of dynamic object access and a clutter of files that lie around openly on your server.
