Instead, the reason why I love working with Flash is because of the clearness of ActionScript 3 and because it s a brilliant write-once distribute anywhere multi-platform approach with a nicely compiled release format.

comments As you know, Adobe dropped the Flash Player for mobile platforms last week which

The disappointment was great when I sat down to implement the new sound API, in particular loadCompressedDataFromByteArray which as the (very terse) API documentation claims can be used to load MP3 files into the Sound class as byte data, just as we need it.

But what if Adobe messes up completely and kills AIR and with that the whole

There is one thing that I can guarantee you that is never going to happen: me starting to develop with HTML or Javascript.

However with the release of Flash Player 11 and AIR 3 there was a promising

Adobe, keen on HTML5 like the rest of the internet committee, by now seems quite willing to throw Flash out of the window easily in exchange for jumping on the bandwagon of HTML5 hype.

Now enter HTML5 and Javascript! It s a bunch of untyped, loose and inconsistent stuff at best.

Flash Player / AIR Runtime: tetragon is fully written in AS3 and so the Flash Player or AIR runtime act as a layer between engine and operating system.

The Flash platform isn t accessible enough to provide well integrated apps on the web.
