sure many audio-related Flash devs have been looking forward to since a long time and HTML isn't even a programming language, it's a markup that reminds me back in horror on the early days of the internet where there was an era during that I used this stuff.

on some other game design- and game development-related things or concentrate wholly onto another technology from now and what my thoughts are about the whole mess that Adobe has caused

If you can please go to Adobe's Bug report site and make some noise

After that we still have the AIR platform for desktop and mobile apps and as long as the AIR platform continues to exist there is absolutely nothing in the way of Tetragon's development.

Quite honestly I'm not sure what to make of this one.

This is how it's done here.

Since the AS3 Sound class had no methods to accept any byte data the workaround to load MP3 files as raw byte data so far has been to load them with URLLoader and then wrap the MP3 data into an in-memory SWF that is created with the help of AS3SWF.

That's what I always wanted to do.
