Seems it wasn't even tested properly.

Neither does it seem to matter for their CEOs and marketing managers that JS and HTML is one giant jumble of incoherent, unoptimized mess that lacks any OOP structure and that no decent game developer on earth wants to code with.

With Javascript you get something that is at the level of ActionScript 1 without strong typing, loads of dynamic object access and a clutter of files that lie around openly on your server.

the AS3 Sound class named `loadCompressedDataFromByteArray` and `loadPCMFromByteArray`! This new API was something I'm

zip files via random access, which is quite cool and something I explained here).

Flash gave me easy access to learn a professional programming language for creating games.

It shows all the major components that tetragon consists of.

it's either time to step back from this all for a while and concentrate

community so I think it's important to let you know where Tetragon is heading

Unfortunately Adobe's so called Bug and Issue Management System seems to be quite bugged by itself.
