After that we still have the AIR platform for desktop and mobile apps and as long as the AIR platform continues to exist there is absolutely nothing in the way of Tetragon's development.

on some other game design- and game development-related things or concentrate wholly onto another technology from now and what my thoughts are about the whole mess that Adobe has caused

Since the AS3 Sound class had no methods to accept any byte data the workaround to load MP3 files as raw byte data so far has been to load them with URLRequest and then wrap the MP3 data into an in-memory SWF that is created with the help of AS3SWF.

That's what I always wanted to do.

Upper layers depend on lower layers, but not vice versa. What follows is a brief overview of the layers and their various components, from bottom to top.

Quite honestly I'm not sure what to make of this one.
