We have *The Human Sexes: A Natural History of Man and Woman* DjVu, PDF, ePub, txt, doc formats. We will be glad if you go back anew.

However with the release of Flash Player 11 and AIR 3 there was a promising  
Now enter HTML5 and Javascript! It s a bunch of untyped, loose and inconsistent stuff at best.  
But what if Adobe messes up completely and kills AIR and with that the whole  
Flash Player / AIR Runtime: tetragon is fully written in AS3 and so the Flash Player or AIR runtime act as a layer  
between engine and operating system.  
comments As you know, Adobe dropped the Flash Player for mobile platforms last week which  
Seems Adobe doesn t want to be bugged about bugs, haha.  
They are following suit with the popularity of the HTML5 dictate and want to jump on the band-wagon as quick  
as possible.  
Instead, the reason why I love working with Flash is because of the clearness of ActionScript 3 and because it s a  
brilliant write-once distribute anywhere multi-platform approach with a nicely compiled release format.  
The disappointment was great when I sat down to implement the new sound API, in particular  
loadCompressedDataFromByteArray which as the (very terse) API documentation claims can be used to load  
MP3 files into the Sound class as byte data, just as we need it.  
raw byte data since this is the only way how it works to read MP3
