of the tetragon game development engine The unusually useless case of loadCompressedDataFromByteArray

Posted by hexagonstar on December 18, 2011 2 comments As you might probably know Tetragon uses zipped

resource packages that are used by it s AIR builds.

With Javascript you get something that is at the level of ActionScript 1 without strong typing, loads of dynamic

object access and a clutter of files that lie around openly on your server.

But the Flex framework is a very attractive solution for building desktop and mobile apps via AIR and Adobe has

added several mobile-optimized UI components to the framework just recently.
